Delayed Settlement

The SAVA component of the SAVA1 exercise/assignment activity will settle through National Securities Clearing Corporation (NSCC). OCC will delay settlement of the SAVAW component of SAVA1 exercise/assignment activity until regular trading in SAVAW Warrants commences. Upon commencement of regular-way trading, OCC will require Put exercisers and Call assignees to deliver the appropriate number of warrants.

NOTE: It is not yet known if the Warrants will cease trading on NASDAQ prior to their expiration. The Warrants are expected to expire at 5:00 p.m. New York City time on November 15, 2024. The SAVAW component of adjusted option SAVA1 will remain part of the SAVA1 deliverable until the Warrants have expired. Once the expiration of the Warrants has been confirmed, the SAVAW will be removed from the SAVA1 deliverable. This change to the deliverables is expected to be effective on November 18, 2024.

Pricing

The underlying price of SAVA1 will be determined as follows:

$$\text{SAVA1} = \text{SAVA} + 0.4 (\text{SAVAW})$$

Further Contract Adjustment

When the Warrants expire, adjusted SAVA1 options will be further adjusted to no longer call for the delivery of the Warrants. **No adjustment will be made to the adjusted contracts to compensate for any in-the-money value the SAVA Warrants may have at the time of their expiration.**

Exercise Considerations

The Warrants are to be suspended from trading before the opening on a date to be determined and expire at 5:00 p.m. New York City time on November 15, 2024. Call option holders who wish to exercise their adjusted options to obtain the Warrants for subsequent exercise, sale or other purposes bear sole

responsibility for determining when to exercise their options as well as complying with all terms and conditions of the Warrants Distribution applicable to Warrants exercise or delivery.

Delivery Settlement and Protect Provisions

Option contracts which are exercised, and physically-settled security Futures contracts which mature, will require the settlement of all component securities included in the contract deliverable at the time of the option contract exercise, including rights, warrants, or similar instruments. Additional entitlements (such as due bills, eligibility to participate in tender offers, elections, etc.) may also automatically attach to securities deliverable upon option exercise. Conversely, exercised calls and or matured Futures contracts may be unable to realize the benefit of securities or entitlements **not** associated to the contract deliverable at the time of the option exercise or Option contract maturity.

Except in unusual cases, securities deliverable as a result of equity option exercises and or Option contract maturity are settled through National Securities Clearing Corporation (NSCC).

Rights and obligations of Members with respect to securities settling at NSCC as a result of an option exercise/assignment are governed by the rules of NSCC. NSCC has its own rules which enable purchasers of securities to protect themselves for value which may be lost if timely delivery is not made to them of securities subject to specific deadlines, such as the expiration of a tender offer, rights offering, election, or similar event. These rules are generally called protect or liability notice procedures, and are intended to protect purchasers by binding the delivering parties to liability if such value is lost because timely delivery is not effected. Purchasers of securities must observe the rules and procedures of NSCC to avail themselves of such protect provisions of NSCC. Questions regarding these provisions should be addressed to NSCC.

Special Risks

Call Holders/ Put Writers

As a result of the adjustment described above, the Warrants will be part of the adjusted SAVA1 options deliverable, but only until the Warrants expire, after which time they will be dropped from the deliverable of the option contract. When the Warrants expire and are dropped from the deliverable of the option contract, any value the Warrants may have had will no longer be associated with the option contract. *As a result, holders of in-the-money calls may be disadvantaged unless they exercise in sufficient time to obtain the Warrants. After the Warrants expire and are dropped from the deliverable of the option contract, holders of short put positions who are assigned will be required to purchase SAVA stock whose value may have been substantially diminished by the Warrants distribution.*

Uncovered Short Obligations

Holders of assigned calls or exercised puts, and holders of short positions in physically-settled security Futures at maturity who do not possess the underlying security at the time of assignment or exercise are subject to special risk. Suspension of trading of the underlying security, inability to borrow the security, or similar events may preclude the possibility of effecting timely delivery, thereby exposing persons with an obligation to deliver to liability if timely delivery is not effected (See Delivery Settlement and Protect Provisions above).
